## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/23/2009 has been entered.

Applicants are informed that the rejections of the previous Office action not stated below have been withdrawn from consideration in view of the Applicant's arguments and/or amendments. Claims 55, 59, 60, 62, 68-73 and 81-89 are examined on the merits. Claims 74-76 remain withdrawn.

Applicant's request for a corrected filing receipt is being processed and will be addressed in turn.

### ***Response to Arguments***

Applicants' arguments filed 11/23/2009 have been fully considered but they are not persuasive. See responses below.

### ***Claim Objections***

Claim 71 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to claims in the alternative. See MPEP § 608.01(n). Accordingly, the claim 71 has not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1648

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 55, 59, 60, 62, 68-76 and 81-93 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The above claims recite multiple Hepatitis C polyprotein fragments, such as residues 13-32 as recited in claim 55.

However, it is unclear what portion of the polyprotein these fragments are from.

Therefore, it is suggested that applicants incorporate a corresponding SEQ ID NO: to reflect the exact location of these domains in the polyprotein. Here is one possible format to follow: "...corresponding to XXX of SEQ ID NO: XX."

### ***Conclusion***

No claims are allowed.
